COLLEGE OF STATEN ISLAND EVALUATION OF STUDENT TEACHING

Cooperating Teacher Evaluation of a Teacher Candidate Form to be completed by <u>Cooperating Teachers</u>

Teacher Candidate's Name	Signature
Cooperating teacher:	School Placement:
College Supervisor:	Date:
Please indicate which evaluation this is for this student:	Subject of lesson(s):
First placement Second placement Other placement:	Grade/Age level taught:

Thank you for supporting our student teachers during field placement.

Teacher Candidates at the College of Staten Island are expected to demonstrate their development from student to educator, one who demonstrates intellectual autonomy and professional responsibility as defined by the Conceptual Framework of the CSI School of Education. The goals of the framework include the acquisition of deep content knowledge, the ability to teach all students, and the ability to use reflective practice in diverse roles and settings. Teacher candidates demonstrate their ability to meet these goals through competency in subject matter, pedagogy, use of assessment, and professionalism.

The following rubric aligns with the InTASC Teaching Standards; edTPA rubrics, required for New York State initial certification; and the Danielson Framework for Teaching, the tool currently used for teacher evaluation in New York City as well as other school districts. Its purposes are to provide:

- A resource for the post-observation conference between the student teacher and college supervisor
- Feedback for critical self-reflection by the student teacher
- Data for analysis by CSI programs and across programs
- Data for improvement of programs in the CSI School of Education

Please evaluate the performance of the student teacher with whom you are working using the rubric. Consider each rubric dimension a developmental continuum, indicating the student teacher's progress in performance on each dimension from Insufficient to Developing to Competent to Effective. These ratings assist the student and College Supervisors in understanding the current developmental stage in each area and provide valuable information about areas in need of focus and support as the field placement proceeds.

Every semester these data are:

- Aggregated and analyzed by each CSI program and across programs
- Reviewed annually to glean implications for improvement of programs in the CSI Department of Education.

Individual programs may choose to do additional evaluation and data collection.

Dimension	4	3	2	1	NA	
Planning for Learning Objectives and Content						
	4 – Strong	3 - Competent	2 – Developing	1 - Insufficient		
Student teacher identifies instructional objectives that reflect knowledge of content and CCSS.	Identifies instructional objectives that reflect strong knowledge of content and CCSS	Identifies instructional objectives that reflect knowledge of content and CCSS.	Identifies instructional objectives that reflect some knowledge of content and CCSS.	Does not identify instructional objectives that reflect knowledge of content and CCSS.		
Student teacher plans activities that align with instructional objectives.	Plans activities that align strongly with instructional objectives.	Plans activities that align with instructional objectives.	Plans activities that partially align with instructional objectives.	Does not plan activities that align with instructional objectives.		
Student teacher plans activities that differentiate instruction to meet individual students' needs.	Plans activities that differentiate instruction to effectively meet individual students' needs.	Plans activities that differentiate instruction to meet individual students' needs.	Plans activities that attempts to differentiate instruction to meet individual students' needs.	Does not plan activities that differentiate instruction to meet individual students' needs.		
Student teacher uses resources that are clearly aligned with the instructional objectives and reflect knowledge of content and CCSS.	Uses resources that are strongly aligned with the instructional objectives and reflect strong knowledge of content and CCSS.	Uses resources that are clearly aligned with the instructional objectives and reflect knowledge of content and CCSS.	Uses resources that are partially aligned with the instructional objectives and reflect some knowledge of content and CCSS.	Does not use resources that are clearly aligned with the instructional objectives or reflect knowledge of content and CCSS.		
Supporting Student Intellectual Engagement throughout Lesson						
	4 – Consistent	3 – Frequent	2 – Occasional	1 – Rare/Not evident		
Student teacher uses activities that require students to engage intellectually with the material.	Consistently uses activities that require students to engage intellectually with the material.	Frequently uses activities that require students to engage intellectually with the material.	Occasionally uses activities that require students to engage intellectually with the material.	Rarely or never uses activities that require students to engage intellectually with the material.		
Student teacher uses a range of questioning and discussion techniques that elicit higher-order thinking.	Consistently uses a range of questioning and discussion techniques that elicit higher-order thinking.	Frequently uses a range of questioning and discussion techniques that elicit higher-order thinking.	Occasionally uses a range of questioning and discussion techniques that elicit higher-order thinking.	Rarely or never uses range of questioning and discussion techniques that elicit higher-order thinking.		
Student teacher provides students time to develop their ideas and answers.	Consistently provides students time to develop their ideas and answers.	Frequently provides students time to develop their ideas and answers.	Occasionally provides students time to develop their ideas and answers.	Rarely or never provides students time to develop their ideas and answers.		

Consistently supports students to productively struggle with concepts and material.	Frequently supports students to productively struggle with concepts and material.	Occasionally supports students to productively struggle with concepts and material.	Rarely or never supports students to productively struggle with concepts and material.	
Consistently encourages students to explain their thinking and appropriately question the thinking of others.	Frequently encourages students to explain their thinking and appropriately question the thinking of others.	Occasionally encourages students to explain their thinking and appropriately question the thinking of others.	Rarely or never encourages students to explain their thinking and appropriately question the thinking of others.	
Consistently encourages students to reflect on their learning.	Frequently encourages students to reflect on their learning.	Occasionally encourages students to reflect on their learning.	Rarely or never encourages students to reflect on their learning.	
4 – Consistent	3 – Frequent	2 – Occasional	1 – Rare/Not evident	
Consistently uses formative and summative assessments aligned to learning outcomes to support learning for all students.	Frequently uses formative and summative assessments aligned to learning outcomes to support learning for all students.	Occasionally uses formative and summative assessments aligned to learning outcomes to support learning for all students.	Rarely or never uses formative and summative assessments aligned to learning outcomes to support learning for all students.	
Consistently monitors student learning (individuals and groups) throughout lesson.	Frequently monitors student learning (individuals and groups) throughout lesson.	Occasionally monitors student learning (individuals and groups) throughout lesson.	Rarely or never monitors student learning (individuals and groups) throughout lesson.	
Consistently provides actionable feedback on individual students' work.	Frequently provides actionable feedback on individual students' work.	Occasionally provides actionable feedback on individual students' work.	Rarely or never provides actionable feedback on individual students' work.	
Consistently provides closing activity that checks for student understanding.	Frequently provides closing activity that checks for student understanding.	Occasionally provides closing activity that checks for student understanding.	Rarely or never provides closing activity that checks for student understanding.	
Maintaining a Safe, Respectful, Supportive, and Challenging Learning Environment				
4 – Consistent	3 – Frequent	2 – Occasional	1 – Rare/Not evident	
Consistently uses language of caring and respect for all students.	Frequently uses language of caring and respect for all students.	Occasionally uses language of caring and respect for all students.	Rarely or never uses of language of caring and respect for all students.
